Traffic Tolerance: Moderate Planting Depth: 1/4" Seedling Emergence: 7-10 Days Drought Tolerance: Good Light Required: Medium to Heavy Shade Recommended Mowing Height: 2½-3

3 Simple Steps

1. PREPARE

BARE SPOTS/NEW GRASS: Remove debris, then rake the soil to loosen and smooth the top layer.

OVERSEEDING/THIN AREAS: Same instructions as above but start by mowing existing grass as short as possible.

2. APPLY

Spread the seed evenly using a drop, rotary or hand-held spreader according to the settings below. Lay down a starter fertilizer to help the seedlings grow healthy and strong. Rake gently to work your seed & fertilizer into the soil.

3. WATER (Most Important Step)

Keep the soil moist! Water daily (twice a day if you have to) until grass sprouts and reaches about 2½-3" tall.

RECOMMENDED SPREADER SETTINGS BARE SPOTS/ OVERSEEDING

SPREADER	NEW GRASS	THIN AR
Republic EZ Drop Spreader	12 ½	10 1/2
Republic EZ Broadcast Spreader	91/2	61/2
Scotts AccuGreen Drop Spreader	15	9 1/2
Scotts EasyGreen	30*	30
Scotts SpeedyGreen Broadcast Spreado	er 13½	11 ½

ADDITIONAL CARE TIPS

- Once your grass is 1/3 taller than the recommended mowing height you may begin mowing it. • Avoid removing more than 1/3 of the total grass blade length at any single mowing to keep your grass thick
- and healthy. Increase your mowing height in summer months to reduce grass stress.

IMPORTANT: Applying weed control products to grass prior to seeding can affect the seeds' ability to grow. Be sure to read and follow all manufacturer's recommendations and application instructions prior to applying any weed control products and prior to seeding. Additionally, do not apply any weed control products to newly seeded areas until the grass is established and has been mowed at least 3 or 4 times. Once newly seeded areas are established, you can begin a regular feeding schedule.

Dense Shade PREMIUM GRASS SEED MIX

PENNINGTON

ESPECIFICACIONES DE SIEMBRA

Áreas Descubiertas / Césped Nuevo: 8 lbs./ 1,000 pies cuadrados Sobre-Siembra / Áreas Poco Densas: 4 lbs./ 1,000 pies cuadrados

Áreas Descubiertas / Césped Nuevo: 375 pies cuadrados Sobre-Siembra / Áreas Poco Densas: 750 pies cuadrados Profundidad de Siembra: 1/4" Surgimiento de Planta: 7-10 días Luz Requerida: Sombra Parcial a Sombra Densa Tolerancia al Tráfico: Moderada Tolerancia a al Sequía: Buena Altura de Corte Recomendada: 2½-3"

3 Pasos Faciles

1. PREPARE ÁREAS DESCUBIERTAS/CÉSPED NUEVO: Remueva todo el desecho, después rastrille para aflojar la tierra y suavizar la capa de arriba.

SOBRE SIEMBRA/ÁREAS POCO DENSAS: Las mismas instrucciones anteriores, pero inicie podando el césped ya existente lo más corto posible.

2. APLIQUE

Propague las semillas de forma nivelada usando una sembradora de caída, rotaria, o de mano propague la semilla de forma nivelada según las posiciones recomendadas a continuación.

3. RIEGUE (El Paso Más Importante) Mantenga el suelo húmedo! Riegue diariamente (dos veces al día si es necesario) hasta que los retoños alcancen 2½-3" de altura.
