

# AXXE BROAD SPECTRUM HERBICIDE

## NEED *to* KNOW

For contact spray control or burndown of weeds and grasses for food crops, field crops, pastures, ornamentals, turf, landscapes, interiorscapes, greenhouses, non-crop areas on farmsteads, and around building and industrial sites.

- ✓ Works Within Hours of Application
- ✓ NOP Compliant
- ✓ No Residue/No Resistance Issues
- ✓ Controls Annual and Perennial Weeds

### WHAT IS AXXE BROAD SPECTRUM HERBICIDE?

AXXE is a non-selective, post emergence weed control for grasses and broadleaf weeds. It is formulated to deliver maximum performance and provides fast-acting results on a long list of weeds and grasses, as well as most mosses and lichens.

### WHAT ARE THE ACTIVE INGREDIENTS?

AXXE is comprised of 40% Ammonium Nonanoate.

### WHAT IS AXXE'S MODE OF ACTION?

AXXE is a soap product that penetrates the cell walls of plants. This will disrupt the cellular organization of physiological functions that are compartmentalized by membranes within the cell walls. Plant growth ceases when cellular contents are mixed, which causes brown necrotic plant tissue.

### WHAT APPLICATIONS CAN I MAKE WITH AXXE?

#### ***Vegatative Burndown:***

Broadcast spray for weed control for no-till planting or seedbed preparation to control weeds prior to seeding or transplanting. Spot sprays may be used in crops, ornamentals, pastures, and turf.

#### ***Directed and Shielded Sprays:***

Spray nozzle type or configuration for directed spray or a shield placed around the nozzle to prevent spray contact on the foliage or green stems or back. Use directed/shielded spray applications to the area between plastic mulch strips and staked crops for weed control.

#### ***Dormant or Post Harvest Spray:***

Apply after crops are harvested to kill weeds and residual green growth of the crop plants. Apply to dormant crops such as alfalfa or turf.

#### ***Sucker Control, Pruning, and Trimming:***

Direct spray to kill small tender basal suckers in crops such as brambles and fruit trees.

#### ***Desiccation and Harvest Aid:***

Apply only when crop is ready to harvest and green crop leaves or weeds interfere with harvest. Spray as a broadcast application over the crop and weeds for rapid desiccation of green plant growth to facilitate harvest. Apply as a harvest aid for cotton, potatoes, and other root, tuber, and bulb vegetables.

#### ***Industrial and Building Uses:***

Apply to weeds in walkways, driveways, parking areas, and around buildings or structures. Broadcast or spot sprays may be applied to open field areas and right-of-ways.

Size	# in Pallet
1 gallon	144 per pallet
2.5 gallon	75 per pallet
5 gallon	32 per pallet
30 gallon	5 per pallet

55 gallon	4 per pallet
275 gallon	1 per pallet

Freight is included on all full pallet quantity orders shipped to locations in the continental USA. Only applicable for ONE shipping location.
