

“I’ve been using Banol as my premier *Pythium*-control product for eleven years now. Generally, I make four to six applications on greens, two to three applications on fairways, and two applications on tees each year. Banol works phenomenally and can be relied upon and trusted through the heat of the season.”

Tony Girardi, CGCS, Rockrimmon Country Club,
Stamford, CT

Turf Disease	Banol Fungicide Use Rate (oz per 1,000 ft. ²)	
	Preventive	Curative
<i>Pythium</i> blight <i>Pythium</i> damping off	1.33 – 2.0	3.0 – 4.0
Re-treat at 7–21 day intervals if conditions remain favorable for disease development. Use the lower rate for the shorter interval and the higher rate for the longer interval within the application rate range. Under severe disease pressure conditions, use the highest recommended rate and shortest interval.		

Banol®

RELAX. YOU’RE BACKED BY BAYER.

Training. Troubleshooting. Innovating. Count on us to stand behind you now and for years to come. Get science and support at BackedByBayer.com or 1-800-331-2867.

WHAT IT IS.

Systemic fungicide for use on golf courses

WHAT IT DOES.

Prevents and cures *Pythium* species

OTHER BAYER PRODUCTS TO CONSIDER.

Many professionals rotate Banol fungicide with Chipco® Signature fungicide for *Pythium* control and improved turf quality for summer stress management.

WHY IT BEATS THE COMPETITION.

It’s one of the industry’s leading *Pythium* control products. Use Banol fungicide with confidence, as it has never had a documented case of *Pythium* resistance in turf.

HOW IT MAKES YOUR JOB EASIER.

With Banol fungicide you can control many *Pythium* species, both root and foliar types. Banol provides outstanding preventive control with a long residual and rainfastness.

THE SCIENCE OF BANOL® FUNGICIDE.

Banol® fungicide delivers preventive and curative protection for *Pythium*. Because Banol has a multi-site mode of action, the potential for fungicide resistance is low. There has never been a documented case of *Pythium* resistance in turf.

Control and prevent foliar and root *Pythium*. Everywhere.

- *Pythium* damping-off
- *Pythium* blight
- *Pythium* root rot

There's a reason it leads the industry.

- Proven *Pythium* control
- Non-phytotoxic and safe on young seedlings
- Excellent control of cool-season *Pythium* root rot
- Ideal in rotational disease resistance programs

Frequently asked questions.

- >Q What products do you recommend rotating with Banol?
- >A We suggest rotating Banol fungicide with Chipco® Signature fungicide. Signature is often used for summer stress programs. It's been proven to activate the immune system of both warm-season and cool-season turfgrasses.
- >Q What about tank mixes?
- >A Banol can be tank mixed with other fungicides to broaden the disease control spectrum.
- >Q What if *Pythium* is present but symptoms are not visible yet?
- >A Banol will provide curative control, and because Banol is systemic, it will prevent future disease outbreaks.

THE SCIENCE OF YOUR PROFESSION.

Every ounce of Banol fungicide is Backed by Bayer, and all the science and support you need to get the job done right. That's what you should expect from an industry leader.

Our staff is your staff.

No one invests as much in product development as Bayer. Our scientists' expertise in chemistry and formulation technology is unrivaled around the world. Our field sales and technical representatives are always ready to help you. You'll find them, along with additional information, 24 hours a day, 7 days a week at BackedbyBayer.com.

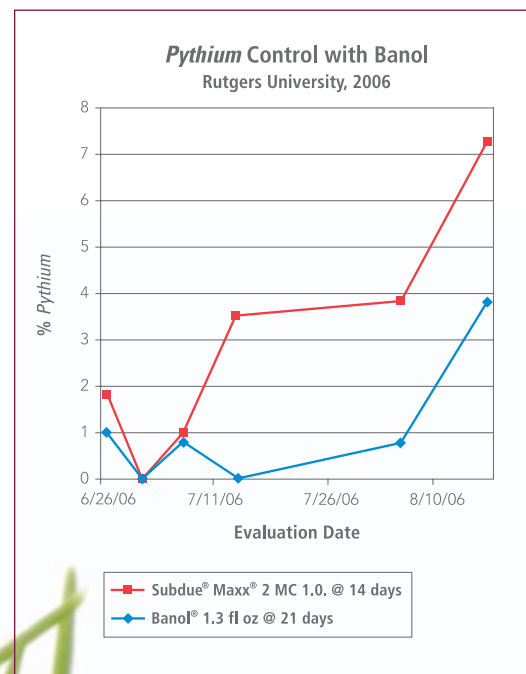

Product support year round.
