CONDITIONER MAX SELECT™

ADJUVANT

GENERAL INFORMATION

Conditioner Max SELECT contains a blend of water conditioning agents that are specifically designed to minimize the interaction between ions and active ingredients. Conditioner Max SELECT contains ammonium ions and has been shown to activate glyphosate tank mixes. Conditioner Max SELECT can be used with any pesticide where interaction with ions may occur and/or ammonium sulfate is recommended in the tank mix. Conditioner Max SELECT should be used wherever acidifiers and acidic tank mixes are allowed. Conditioner Max SELECT is especially effective when mixing weak-acid herbicides such as glyphosate and 2,4-D in the spray tank.

DIRECTIONS FOR USE

Conditioner Max SELECT does not contain surfactant or oil. If the pesticide label recommends or requires the use of a surfactant or oil, these should be added along with Conditioner Max SELECT. This product lowers pH into a range which enhances the performance of most weak acid pesticides. Use with pesticides that are compatible with lower pH. Do not use with copper-containing fungicides. Minimize worker exposure by using measures that are required for pesticide handling.

Conditioner Max SELECT may be added before or after the pesticide is added to the tank mix. Although addition before hand will prevent unwanted interactions, the interaction may be reversed afterward although addition of larger amounts may be required. Never exceed the highest recommended dose.

RECOMMENDED USE RATES

Ground: 0.5 to 2 quarts per 100 gallons

Aerial: 1 to 2 quarts per 100 gallons.

Water Conditioning: 1 to 5 pints per 100 gallons of spray tank solution is highly effective as an acidifier and water conditioner.
8.5 lbs. of AMS per 100 gallons has been proven to be replaced by 2 quarts of Conditioner Max SELECT.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. Do not contaminate water, food or feed by storage or disposal of this product. For optimal storage, store between 40° and 90° F.

Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal if allowed by law. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
