### GENERAL INFORMATION

DR. IRON LIQUID is designed to promote rapid turf green-up and dark green color. DR. IRON LIQUID is most effective when plants are growing rapidly and least effective when plants are dormant or suffering from stress. DR. IRON LIQUID is compatible with most commonly used herbicides, insecticides, fertilizers and fungicides.

### PRECAUTIONS

- Shake container well before using.
- Do not apply with aluminum based fungicides.
- Store above 50°F.
- Do not apply foliar spray to plants stressed from moisture or heat.
- If spilled on concrete, wash off immediately.

### DIRECTIONS FOR USE

#### APPLICATION DIRECTIONS IF PACKAGED AS A CONCENTRATE:

MIXING: Add one-half water to the tank; then add DR. IRON LIQUID. Agitate while adding remaining water. Spray solution as soon as possible.

#### APPLICATION DIRECTIONS IF PACKAGED WITH A HOSE-END SPRAYER: (Turf/Lawn Application Only)

1. Attach garden hose to spray nozzle.
2. Turn on water supply.
3. Point nozzle toward lawn, bend safety tab and turn control to "ON".
4. Product will automatically mix with water. Walk back and forth at a steady pace.

### TURF / LAWNS

Bahiagrass, Bentgrass Bluegrass, Centipedegrass, Tall Fescue, St. Augustinegrass, Zoysiagrass, and other Northern Grasses	Apply 6 fl. oz. per 1,000 sq. ft. with sufficient water for good coverage. Three to five applications per growing season usually produce the best results.
Bermudagrass	Apply 6 fl. oz. per 1,000 sq. ft. with sufficient water for good coverage. Three to five applications per growing season usually produce the best results.

Spray volumes can range from 0.5 – 4 gallons of spray solution per 1,000 sq. ft. for adequate coverage.

**NOTE:** Turf will typically utilize 1 – 4 lbs. of nitrogen per 1,000 sq. ft. each growing season. Use this product in conjunction with an additional fertilization program to provide at least 1 lb. of nitrogen per 1,000 sq. ft. each growing season. Consult your local Agricultural Extension Agent for the proper amount of nitrogen to be applied in your area.

### ORNAMENTALS

	Amount of DR. IRON LIQUID Required for 1 Gallon of Solution
Herbaceous Plants	2 teaspoons
Shrubs	2 fl. oz. (4 Tbsp.)
Trees	1.25 fl. oz. (2.5 Tbsp.)

Equivalent measures: 1 fl. oz. = 6 teaspoons = 2 tablespoons

**NOTE:** DR. IRON LIQUID should supplement a sound fertilizer program for ornamentals and applications should be made as a thorough cover spray.

Undiluted DR. IRON LIQUID is corrosive to mild steel, aluminum and brass and must be stored and/or shipped in fiberglass, polypropylene or stainless steel. Use only stainless steel or PVC fittings.

### CONDITIONS OF SALE AND WARRANTY

Lawn and Garden Products, Inc. (LGPI) warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. LGPI neither makes, nor authorizes any agent or representative to make, any other warranties, express or implied, including fitness or merchantability.

The directions for use of this product are believed to be realizable and should be followed carefully; however, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of LGPI and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling, storage and use of this material not in strict accordance with directions given herewith. In no case shall LGPI or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by LGPI and is accepted as such by the Buyer.
