

Hexygon[®] DF

Ovicide / Miticide

For Ornamental Nurseries and Greenhouses*

To assist customers in converting rates for small spray volumes,
Gowan Company offers these guidelines:

Number of level teaspoons to add to the following amounts of water:

| <u>Water</u> | <u>1oz/100 rate*</u> | <u>2 oz/100 rate*</u> |
|--------------|----------------------|-----------------------|
| 1 gallon | 1/8 teaspoon | 1/4 teaspoon |
| 2 gallons | 1/4 teaspoon | 1/2 teaspoon |
| 4 gallons | 1/2 teaspoon | 1 teaspoon |

*Dilution based on label recommendation per 100 gallons of water.
By weight, 1 ounce = 28.35 grams

Comment:

This volumetric guide provides a reasonable, accurate measurement of weight, but where a high degree of accuracy is required, the material should be weighed.

Hexygon is a contact miticide and good coverage is essential for optimum performance. Use sufficient volume to obtain thorough, uniform coverage. Spray all foliage surfaces including the underside of leaves for complete coverage.

Note: Do not apply Hexygon more than once per crop cycle.

*Ask your local dealer or Gowan Company representative for a supplemental label for greenhouse use. You may also access the supplemental label on the Gowan web site, www.gowanco.com.

For further information on Hexygon or any of Gowan Company's product line, please call our inquiry line: 800-883-1844, ext. 2, or visit our web site.

Follow all applicable directions, restrictions and precautions on the EPA registered label.
