

ONCE YOU KNOW YOU HAVE THEM, KNOW HOW TO GET RID OF THEM.

TAKE NO PRISONERS!

## Rodents just die for Just One Bite® II

- Kills house mice, roof rats and Norway rats
- Norway rats and house mice may consume a lethal dose in one feeding
- Just One Bite® II has been treated with methoprene to protect the bait from infestation by insects
- Kills warfarin resistant Norway rats
- Contains rodents' favorite foods – grains and seeds
- Contains Bromadiolone, a second generation anticoagulant

## Choose Your Weapon

### Bars

- Features special nibble ridges rodents love to chew
- Use whole or break into chunks
- Hole through middle makes mounting on walls and posts easy

### Chunks

- Can be nailed to walls or posts
- Ideal for use in bait stations

### Pellets

- Finger food for rodents—they pick it up with their front feet
- Rodents eat right through packet
- Sealed packs keep bait fresh

RODENT  
CONTROL GUIDE

**WANTED  
DEAD**

The three most common  
criminal rodents.

## House Mouse

- Often found indoors.
- Contaminates food with fur and feces.

## Roof Rat

- Found indoors and out, in trees, on roofs and in attics.
- Feeds above the ground.

## Norway Rat

- Found indoors and out, in rubbish, wood piles and building foundations.
- Likes to live in basements and ground floors.

## Signs of a home invasion

**If you spot a rat or mouse, odds are more are lurking. Telltale signs include.....**

- Rodent droppings. Dark in color, from 1/8" to 3/4" long.
- Tracks and tail drags through dust and dirt.
- Greasy rub marks on walls from rodents as they run along their route.
- Household pets excitedly pawing at cabinets, under appliances or walls.
- Scampering and scratching noises coming from the walls and ceiling at night.
- Evidence of gnawing and chewing on boxes, wires, packaged goods and around pipes, ducts and vents.
- Rodent burrows or nests outside of buildings.
