

The versatile bait with proven results.

- A variety of formulations to customize your rodent-control solution
- More than three decades of trusted performance
- Made by Liphatech, the inventors of the original bromadiolone bait

# Maki<sup>®</sup>

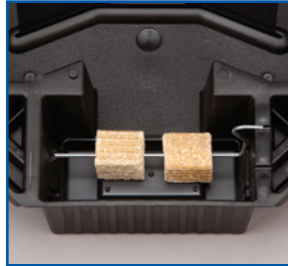

Rodenticide

Controls rats and mice wherever they live.

Trusted and used for more than three decades, with several formulations enabling you to fight rodents under tough conditions.

**Reliable**—Trusted by technicians for decades.

**Blocks**—Each 1 oz. and easy to apply to bait rods.

**Burrows**—Use paraffinized pellets to attack Norway rats.

**Sewers**—1 lb. paraffin bars hold up and perform in these conditions.

- The highly effective, second-generation, single-feed anticoagulant
- Formulated with bromadiolone, invented by Liphatech
- No bait shyness
- Readily available anticoagulant antidote: Vitamin K<sub>1</sub>
- Convenient baiting options: Mini-blocks, 1 lb. blocks or pellets (bulk or place packs)
- Maki blocks are easily placed on bait rods for security, freshness and palatability
- Maki pellets are paraffinized for great weatherability; perfect for and labeled for burrows
- Labeled for sewers—1 lb. paraffin blocks for tough, wet conditions
- Easily separate 1 lb. bar into 8 portions, 2-ounces each
