

UNBEATABLE FLEXIBILITY

NIBOR-D[®]

Revised & Expanded Label

**NEW
LABEL**

The versatility of Nibor-D has always given PMPs a single multipurpose tool capable of several application types in many different situations to control a wide variety of pests, including ants, cockroaches, silverfish and crickets.

Now, Nibor-D's newly expanded label adds even more pests, application sites and application methods for greater-than-ever flexibility against pests.

Green-tinted for use in USDA facilities.

- *Listed pests include:** Ants • Crickets • Cockroaches • Silverfish • Earwigs • Fleas • Dust Mites • Lady Bugs • Fruit & Drain Flies • Cluster Flies • Bird & Poultry Pests (Darkling Beetles, Hide Beetles) • Millipedes • Wood Destroying Pests (Termites, misc. Beetles & Borers, Decay Fungi)

The expanded label adds foam, liquid and dust applications and sites to the many already listed, including: **Liquid Broadcast for Flea Larvae & Dust Mites** • Application into **Floor Drains, Manhole Covers & Cavities, Sewers, Refuse Containers** • Treatment of **Attic Insulation** • Treatment of **Bird & Poultry Production Facilities** • **Mop Solutions for Small Flies** • **New Construction Treatment for General Pest Prevention**

*The newest label additions are shown in **green**. Not labeled for mildew and fungus in California.
