PetAg Brand Nursers

*Designed by Veterinarians
for Professionals*

A nurser developed to promote the natural feeding of Esbilac[®], KMR[®], or other liquids to animals

PetAg Brand Nursers offer:

Bottles and nipples

- Specially designed for small and large babies
 - 2 ounce for small animals
 - 4 ounce for larger animals
- Rugged enough to be sanitized with boiling water for reuse
- Bottle feeding allows animals to refuse formula when full
- Nursing action develops facial muscles and stimulates the normal flow of saliva

Bottles

- Durable enough to stand up to hard use
- Marked with graduations to make monitoring food intake easier and to help prevent over or under feeding

Nipples

- Elongated & balloon styles for longer palates, wildlife and exotic species
- Constructed of durable, flexible latex that are readily acceptable

Nursing Kit contains

- Cleaning brush sized for the bottle to make washing thorough and easy
- Three to five nipples per bottle to give you extras enough for larger litters

Bulk Pack

- bottles with nipples available for counter display and professional use

DIRECTIONS FOR USE:

- Before use make a hole in the nipple using one of the following methods
 - Cross cut nipple with a razor blade
 - Using a strong needle or cuticle scissors, enter and exit the tip of the nipple as though you were making a very small stitch or snip, pull the needle out removing a small piece of the nipple
- Check flow with water. A steady drip or thin stream should be achieved when a slight pressure is applied to the nipple
- If one or more of the animals is ill use a different bottle or feed ill animal last
- Wash bottle, cap, and nipple with hot soapy water and rinse thoroughly after each feeding session
- If animal is too small or weak to nurse, feed with a syringe or eye dropper until the animal is capable of nursing from a bottle
