

# Pup Wash

## No Sulfates, Artificial Fragrances or Parabens

The soil derived microbes in Pet Peeve™ Pup Wash™ shampoo start working immediately to clean the way Mother Nature intended by digesting odor causing organic molecules. The probiotics also cling to an animal's coat to combat odor long after your pet's bath is over.

### Directions for Use

To bathe, first soak the pet's coat with warm water. Apply a sufficient amount of Pup Wash™ relative to the size of the pet and evenly massaged into the pet's coat to work up a lather. The longer the product is massaged into the pet's coat, the better the microbes will perform. Rinse Pup Wash™ lather thoroughly from the pet's coat with warm water. Repeat application as needed, whenever the pet becomes soiled or smelly. For lasting odor control between baths, spray your pet with Pet Peeve™ Odor Fixer™ by EcoTreat™ Products to reload beneficial probiotics.

The probiotic microbes in Pup Wash are also ideal for eliminating skunk odors. To eliminate skunk odors, wash pets using the directions above, but wait at least 15 minutes before rinsing to give the probiotic microbes additional time to digest the skunk odor. For additional odor elimination power, spray your pet with Pet Peeve™ Odor Fixer™ by EcoTreat™ Products.

### Common Sense Precautions

Do not apply to food or direct food contact surfaces. Do not allow children to apply product. If more than an incidental amount is swallowed, seek medical attention. Give one glass of water and do not induce vomiting. Wash hands well after use and before eating or smoking. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for any persistent irritation. Store out of reach of children and in a closed, appropriately labeled container between 35 and 95 °F.

### Ingredients:

*Water, alpha olefin sulfonate, coconut fatty acid DEA, cocamidopropyl betaine, probiotic microbial blend, mint oil, sodium borate, sodium chloride, citric acid, microbial stabilizer*

**Net Contents: 16 fl oz**
