**Keep Out of Reach of Children**

### **WARNING**

See back panel for additional precautionary statements.

**POINTER™**  
**Insecticide****DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its label.

Net Wt. 0.36 oz. each  
4.32 oz. total

**STORAGE AND DISPOSAL**

**Do not contaminate water, food or feed by storage or disposal.**

**Storage:** Store above 65°F in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food and feed. Store in original container and out of reach of children, preferably in a locked storage area. **Disposal:** Do not reuse empty container; wrap and put in trash.

This product contains an insecticide that is injected into holes drilled into the tree trunk at the flare of the tree. The insecticide controls Adelgids, Armored Scales (suppression), Aphids, Elm Leaf Beetles, Black Vine Weevil Larvae, Eucalyptus Longhorned Borer, Flathead Borers (including Bronze Birch Borer and Alder-Birch Borer), Japanese Beetles, Lacebugs, Leafhoppers, Leafminers, Mealybugs, Pine Tip Moth Larvae, Psyllids, Royal Palm Bugs, Sawfly Larvae, Soft Scale Insects, Thrips (suppression), White Grub Larvae (such as Japanese Beetle Larvae, Chafer, *Phyllaphaga* spp., Asiatic Garden Beetle and Oriental Beetle) and Whiteflies on all types of trees.

The pre-measured doses are convenient and easy to use.

**TOOLS:** Tape measure and 3/8" drill.

**DOSAGE:** Measure the circumference of the tree trunk at 4 feet above the ground.

You will need one ampule (0.36 oz.) for every four to six inches of circumference.

**INSTRUCTIONS:** Drill 1/2" deep holes into the tree at the flare of the tree. The holes should be drilled at a downward slant (about 45°). The holes should be evenly spaced around the tree. Use only a clean, sharp drill bit. Brad point drill bits are best.

Use rubber or neoprene gloves when handling this product.

Cut off the tip and squeeze the chemical into the holes. Use one ampule for every hole.

**Treatments are more effective early in the growing season. Injections to conifers may either be slow in uptake or have no uptake at all.**

**NOTE: Holes drilled in a tree are wounds. Three-eighths inch and larger holes at 3 inch spacing should not be drilled in a tree more than once a year nor more than two consecutive years.**

**PRECAUTIONARY STATEMENTS****Hazards to Humans and Domestic Animals**

**WARNING:** Harmful if swallowed, inhaled or absorbed through skin. Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Wear safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before use. Do not apply to food-bearing plants.

**Statement of Practical Treatment**

**If Swallowed:** Call a physician or poison control center. Do not induce vomiting. Drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol.

**If In Eyes:** Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

**Environmental Hazards**

This product is highly toxic to fish and aquatic vertebrates. Do not apply to water or allow runoff from treated areas to contaminate aquatic sites. Do not contaminate water when disposing of equipment washwaters. This product is highly toxic to bees exposed to direct treatment or residues. Do not apply this product to blooming plants if bees are visiting the treatment area.

**NOTICE OF WARRANTY**

ArborSystems, LLC warrants that this product conforms to the description on the label and is reasonably fit for use under average conditions when used strictly in accordance with the directions on the labeling. ArborSystems, LLC does not make nor authorize any agent or representative to make any other warranty, guarantee or representation, express or implied, concerning this product.
