May be harmful if swallowed.

#### GENERAL INFORMATION

Sequestar<sup>®</sup> Iron 6% chelate is a water-soluble iron that is readily available to plants. It can be soil applied to prevent or correct iron deficiency (chlorosis).

Sequestar<sup>®</sup> Iron 6% is formulated with EDDHA chelate to extend iron availability to plants, especially those grown in calcareous, alkaline or acid soils. It may be dissolved in water or spread as a granule. For best results, Sequestar<sup>®</sup> Iron 6% should either be incorporated into the root zone at planting, injected into the root zone, or surface applied and moved into the root zone by tillage, drenching, irrigation or rainfall.

#### DIRECTIONS FOR USE — GENERAL

Apply Sequestar<sup>®</sup> Iron 6% annually in the spring and when iron chlorosis symptoms appear.

**Soil Application** – For trees and shrubs uniformly broadcast or mix with water and apply to the soil with the drip line beneath the plant and shallowly incorporate or irrigate into the soil.

#### DIRECTIONS FOR USE — SPECIFIC

- 1) Trees (including fruit, citrus and nut trees) – Apply ½ - 2 oz. for each inch of trunk diameter measured at chest height.
- 2) Shrubs (including berries, grapes, roses, etc.) – Apply 2 oz. for small shrubs and 2 oz. per inch of trunk diameter for large shrubs.
- 3) Ornamental Bedding Plants, Vegetables, Groundcovers – Apply 2 oz. per 100 square feet or band 2-4 oz. per 100 feet of row. Water in immediately.
- 4) Lawns – Apply up to 4-8 oz. in 2 gallons of water per 1,000 square feet. Water in immediately.
- 5) Potted Plants – Apply ¼ teaspoon per 8 inch pot and ½ teaspoon per 12 inch pot. Apply to the soil and water in.
- 6) Hydroponics System – Apply at 4 oz. per 100 gallons of water. For best results, apply monthly.

#### PRECAUTIONS

If applied to certain surfaces, staining may occur. Wash or wipe off before it has a chance to dry.
