InVade
technology

SeptiTreat™

InVade™ SeptiTreat™ contains premium natural microbes that digest organic waste, including fats, oils, and grease (FOG), carbohydrates, proteins, cellulose, and urea and reduce odors. Septic systems work by using naturally occurring bacteria to breakdown and liquefy waste. If the system doesn't work properly, back-ups, lawn damage and foul odors can result. The bacteria in SeptiTreat help replenish the natural bacteria in the septic system that can be overloaded by large amounts of waste, or excessive use of disinfectant chemicals. On a quarterly basis, one 8 oz bottle of SeptiTreat is simply poured into the toilet and flushed. SeptiTreat may also be poured down a drain, followed by about a gallon of water.

Label and MSDS are available at www.rockwelllabs.com.

Natural Biological Treatment to Keep Septic Systems Functioning Properly

Product Code:
IBST008 - 8 oz bottle
