

SureGuard[®] Herbicide + Glyphosate Weed Control Program

Lawn Care Operators (LCOs) looking for the premier program for landscape and bareground weed control can count on the best weed control program with *SureGuard* Herbicide + glyphosate. Tank mixtures of *SureGuard* with glyphosate provide faster and more effective weed control than glyphosate alone, which ultimately keeps weeds out and customers happy.

SureGuard + Glyphosate delivers:

- Faster postemergence control than glyphosate alone
- Pre and postemergence control of a broad spectrum of tough broadleaf and grassy weeds – even on glyphosate-resistant weeds
- Longest residual control available

Postemergence Application	Application Rate
<ul style="list-style-type: none"> • Established landscape ornamentals have shown tolerance to applications of <i>SureGuard</i> + glyphosate only when applied to the soil at the base of the plant, and sprays do not directly contact or drift onto desirable plants • For maximum plant safety when using around desirable ornamentals, direct applications of <i>SureGuard</i> + glyphosate towards the soil, and leave a sufficient non-treated buffer to ensure spray solution does not contact desired plants 	<p>Apply <i>SureGuard</i> at 1 tsp per gallon (10 oz/ A) to actively growing weeds</p>

SureGuard + Glyphosate = Faster & More Effective Control

Tank mix of SureGuard + glyphosate delivers 4+ months of control
