TARGET SELECT™

ADJUVANT

PRINCIPAL FUNCTIONING AGENTS

Proprietary Polyvinyl Polymer Emulsion	100.0%
Total.....	100.0%

All ingredients are exempt from tolerance under 40 CFR 180

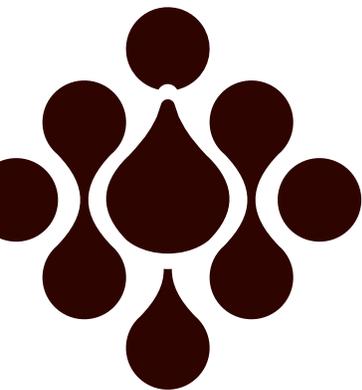

DEPOSITION AID AND DRIFT CONTROL AGENT

KEEP OUT OF REACH OF CHILDREN WARNING

Harmful or fatal if swallowed. Avoid contact with skin, eyes or clothing. Do not eat, drink, smoke or chew gum while using this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. In addition, follow precautionary statements on all products used with this material. Clean affected clothing, shoes, and protective equipment before reuse. Personal Protection Equipment: Wear chemical-resistant eyewear and gloves, long-sleeve shirt and pants and shoes and socks.

FIRST AID

IF SWALLOWED:	<ul style="list-style-type: none"> • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes.
IF INHALED:	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.
IF IN EYES:	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.
Call a poison control center or doctor immediately for treatment advice. Have the product container with you when calling a poison control center or doctor, or going for treatment.

TARGET SELECT™

ADJUVANT

GENERAL INFORMATION

Target SELECT is a deposition aid and drift control adjuvant, designed for ease-of-use in spray operations. Target SELECT can be used with a large variety of ground and aerial arrangements, including A.I. and other drift reduction nozzles. Target SELECT is compatible with all brand name and generic glyphosate formulations, as well as a wide range of other active ingredients, and adjuvants in tank mixes.

DIRECTIONS FOR USE

Use rates can be adjusted to compensate for environmental conditions or mechanical factors. Lower rates may be used when spraying under calm winds, slow application speeds, low pressures, and lower boom heights with nozzles closer to the target. The greater the shear on the spray boom nozzle head, the greater the spray droplet fragmentation which produces fines (mists) that may drift to non-targeted areas or evaporate. For best results in aerial application, use state-of-the-art techniques such as pressure less than 45 psi and nozzles oriented 45 degrees back to straight back.

USE RATES

Target SELECT performs effectively at ultra-low use rates, even as low as 1-4 oz. per 100 gallons of water. Start with low use rates and increase as needed. A thickened or "stringy" solution indicates that too much Target SELECT has been used.

1. Select proper rate for the spraying operation.
2. Fill mix tank with water, pesticide, fertilizer, surfactant/additives and agitate.
3. Shake bottle well before using.
4. For best mixing results, either (1) inject Target SELECT liquid into the suction side of the feeder, or recirculating pump, to obtain adequate dispersion of the polymer throughout the pesticide solution, or (2) slowly add Target SELECT liquid to the agitating tank mix at the area of highest turbulence.
5. Continue to agitate mix tank for at least 3 minutes before spraying.
6. Follow all cleanup precautions on label of pesticide used.

SPRAY PRESSURE	NOZZLE ORIENTATION	USE RATE
Aerial Application - applied below 45 psi	Straight Back	2 - 6 oz./100 gal.
	45° Angle Back	4 - 8 oz./100 gal.
Ground Application Low - applied below 30 psi	Flat Fan, Flooding	1 - 4 oz./100 gal.
	Off-Center	3 - 5 oz./100 gal.
Medium Application - applied between 30 - 50 psi	Flat Fan, Flooding	3 - 4 oz./100 gal.
	Off-Center	4 - 6 oz./100 gal.
Spray Guns Low Pressure - applied over 50 psi		5 - 8 oz./100 gal.
Spray Guns High Pressure - applied over 50 psi		8 - 32 oz./100 gal.
Higher spray pressure or greater agitation requires higher rates to maintain good drift control. If unacceptable drift is still occurring, add additional Target SELECT in increments of 1 oz. per 100 gal. of spray solution		

STORAGE AND DISPOSAL

Storage: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. DO NOT FREEZE. Store in cool dry place at temperatures between 45°F and 90°F. Do not store in mild steel or aluminum containers.

Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal if allowed by law. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
