

# TRUST YOUR HOME TO TEMPRID FROM BAYER

With TEMPRID, you get more than better pest-stopping power, including:

- Faster control of unwanted pests, including some that other leading products can't control
- The comfort of knowing you can stay in your home – before, during and after treatment
- Higher satisfaction and the need for fewer follow-up visits to re-address pest problems
- Reduction in the amount of product required for maximum pest control each year
- The ability to successfully stop pests outside before they make their way indoors
- The support and trust that come with being Backed by Bayer, a name families have trusted for more than 150 years

## BAYER ENVIRONMENTAL SCIENCE

As a leading manufacturer of pest management products, Bayer Environmental Science is focused on creating innovative products that respond to the challenges faced by pest management professionals, enhancing healthy living conditions and improving quality of life.

## Temprid™ SC Insecticide

*Unsurpassed Ant Control  
and One-of-a-Kind Home  
Perimeter Protection.*

Bayer Environmental Science

## THE TEMPRID ADVANTAGE

### an unbeatable combination

Your decision to work with a pest management professional (PMP) is an important one for you and your family, just as your PMP's product choice is important to his/her business and the quality of service he/she can provide.

Temprid SC Insecticide from Bayer Environmental Science is the one solution your PMP needs to tackle the most common unwanted pests that invade your home, such as ants, spiders, cockroaches and more.

Temprid delivers unsurpassed ant control and one-of-a-kind home perimeter protection. Its unbeatable combination of speed of control and reliable, long-term residual guarantees that Temprid will keep working for you long after it's applied.

And Temprid is Backed by Bayer,<sup>™</sup> which means you can rest assured that the company you've trusted for more than 150 years stands behind its performance.

## THE SCIENCE BEHIND TEMPRID

Temprid is a pest control solution that was designed specifically with the homeowner's expectations of fast, dependable, long-lasting control of ants and other perimeter pests in mind.

### unsurpassed ant control

Temprid controls ants on contact and also targets insects like aphids, scales and mealybugs that produce honeydew, the food source ants prefer most.

Eliminating the food source is critical to long-term control. Ants won't build a colony in areas where they can't sustain themselves, their queen, and their young.

### one-of-a-kind home perimeter protection

Your PMP can customize the right perimeter treatment plan to protect you and your family from pests before they make their way indoors. With Temprid, your PMP can stop unwanted pests before they enter your home.

Temprid not only stops pests that live on the surface, but also targets soil-tunneling pests that live and breed underground. It also works quickly to eliminate pests that may impact human health, including spiders, ticks, and cockroaches.

## BETTER PROTECTION, HIGHER SATISFACTION

Temprid outperforms the leading competitors when it comes to controlling the pests that homeowners face most often.

### Real-world trials show:

- Temprid controls ants, household pests and occasional invaders faster than the leading product.
- Homeowners whose properties are treated with Temprid for ant infestations can expect a high level of satisfaction with the results.
- Temprid delivers better, more reliable control of spider infestations longer than the leading product.
