Mattress Safe[®] Product Description

Sheet

A fire retardant barrier that does not come in contact with the body has been carefully added and tested by the National Fire Protection Agency and Passing the Cigarette Burn Test - CFR Title 16 Part 1632 (FF4-72) Standard for Flammability.

Bed bug certified, Mattress Safe's[®] Sofcover[®] Superior Total Mattress Encasement has been tested by board certified entomologists and certified for protection against bed bugs and dust mites. You can sleep safe and sound knowing that bed bugs cannot bite through the laminated fabric of Mattress Safe's[®] Superior mattress encasement.

Unique and built directly into Mattress Safe[®] products, the patented "Zipper with the Hook" enclosure ensures the proper resistance for sealing your items against bed bugs and dust mites. (U.S. Patent #7,849,543) The zipper and hook combination prevents infestation and quarantines infested items from spreading pests.

By applying Mattress Safe's[®] mattress encasements before any signs of bed bug infestation, you will minimize the available areas for nesting as well as provide the means for an easy detection of bed bugs. As a pest management application, Mattress Safe[®] encasements eliminate the use of chemicals to entrap and kill bed bugs in an infested mattress.

Proudly supporting our nation's economy, 90% of Mattress Safe's[®] product selection is made right here in America. Our Sofcover[®] collection is not only our premier product selection, but our US manufacturing plant allows us to create unique and custom designs. Mattress encasements and protectors made with Mattress Safe's premier product selection, the Sofcover[®] collection, are made in USA.

A minimal investment in mattress encasements can prevent the loss and the heavy cost of replacing a mattress and box spring. Even without a problem, Mattress Safe[®] products are a cost effective and preventative measure in protecting your bedding investment.

lectularius) could penetrate and feed through the fabric when a human host was present. The results prove that no bed bugs fed through the laminated fabric, the zipper enclosure, or the zipper seams during the evaluation. The zipper closure also prevented bed bugs from escaping during the study and prevented debris from passing through the zipper.

- **Fire Retardant** - Material was tested to “CFR Title 16 Part 1632 (FF4-72) Standard for the Flammability of Mattress and Mattress Pads - Ticking Substitution Procedure Part 1632.6” and received in conclusion a “B” Classification and tested to meet the American Standard ULV-O Burn Test requirements.

Directions for Application:

Apply the protector on top of mattress with the soft side to the outside and the laminated side touching the top of the mattress.

Care Instructions:

Cold water wash with regular detergent. No bleach. Cool dry. Do not iron.
