 EXTINGUISHING MEDIA: CO<sub>2</sub>, dry chemical, foam.  
 SPECIAL FIRE FIGHTING PROCEDURES: Isolate fire area. Evacuate downwind residents and all areas where fire seriously threatens the product containers. Wear full protective clothing including rubber boots, neoprene gloves and self-contained breathing apparatus. Attempt to keep containers cool. Do not breathe or contact smoke or vapors.

## Section VI - Health Hazard Information

---

ROUTES OF ENTRY: Contact, ingestion.

EYES: Direct and prolonged eye exposure to the concentrated product may cause corneal opacity, irreversible eye damage.

SKIN: May cause mild skin irritation in some individuals. Harmful if absorbed through skin. Prolonged or repeated overexposure may result in effects similar to those caused by ingestion.

INGESTION: May cause muscle weakness, nausea, diarrhea, and abdominal pain. **MEDICAL CONDITIONS POSSIBLY AGGRAVATED BY EXPOSURE:** Skin exposure may aggravate existing skin conditions. Exposure to mist may aggravate existing respiratory conditions.

**CHRONIC HEALTH EFFECTS:** Chronic overexposure to dicamba may cause liver changes or a decrease in body weight. The EPA's Science Advisory Panel has given dicamba a class D classification (not classifiable as to human carcinogenicity). Animal tests with dicamba have not shown carcinogenic, terato-genic or other reproductive effects with the exception of slightly reduced fetal body weights and post implantation losses reported at the Maximum Tolerated Dose level. The available evidence on MCPA and triclopry indicate that they do not pose a carcinogenic or mutagenic risk. Triclopry is not considered a teratogen, but no conclusions can be drawn about the teratogenic risk of MCPA.

## Section VII - Precautions for Safe Handling/Use

---

### FIRST AID:

EYES: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.
