

# Fast, non-selective control of emerged weeds

 **BASF**  
We create chemistry

Finale® herbicide gives you fast, effective control of a broad spectrum of emerged annual and perennial grasses, broadleaf weeds, and woody species. It's absorbed rapidly through green tissue and produces results in one to four days under many conditions. And it controls even the toughest weeds, like poison ivy, dandelion and thistle.

- **Works fast:** Visible results and control in 2-4 days under good growing conditions
- **Year-round control:** Use year-round for control of many weeds

**Finale**®  
Herbicide

## Best Uses

- Fast, non-selective control of a broad-spectrum of emerged annual and perennial weeds
- Controls tough weeds, like *Poa annua* goosegrass, poison ivy, dandelion and thistle
- Post-emergent, non-selective herbicide for use on dormant bermudagrass

## Attributes

- This product is non-selective – it will injure or kill all green vegetation contacted by the spray
- Works best when weeds are actively growing
- Does not “creep” or spread like glyphosate; this in turn allows for precise edging of ornamental beds
- Minimal soil-residual activity means transplanting or seeding is possible hours after application
- Effective tank-mix component, compatible with many popular pre-emergent herbicides

*Finale herbicide can be used to edge perennial beds and keep turf from encroaching into the beds.*

## Use Sites

- Paths
- Parking Lots
- Curbs
- Sidewalks
- Around Buildings
- Gravel Areas

## How to Apply

- Finale herbicide is labeled for both spot treatments and broadcast applications
- Plants that have not yet emerged at the time of application will not be controlled

### Spot Treatment

- Treat small areas of weeds using 2-4 fluid ounces of product per gallon of water

### Broadcast Applications

- Apply 2-6 quarts per acre depending upon the weed and stage of growth
- Use a minimum of 40 gallons of water per acre with a minimum of 30 psi spray pressure
- Use higher rates within the recommended rate range for plant sizes listed when vegetation cover is dense

*Use Finale herbicide in landscape beds to eliminate existing weeds.*

- Storage Yards
- Fence Rows
- Hardscapes (including crack and crevice)
- Mulched Areas
- Landscape Ornamental Beds

Always read and follow label directions.
