CATCHMASTER BULK GLUE

Directions for Room Temperature Application:

1. Wearing gloves, dip hands and scissors in soapy water to prevent glue from sticking.
2. Pull out desired amount of glue from the container. Once you have removed the glue, clip off the excess as it is stretched.
3. Place glue on foil, cardboard, in plastic trays, in the bottom of boxes or other intended applications.
4. Spread glue with gloved hands or putty knife to fill trap area to depth of 1/4" for rats or 1/8" for mice and insects.

Directions for Hot Application:

**WARNING –USE EXTREME CAUTION WHEN HANDLING HOT GLUE
SUBSTANCE BEHAVES LIKE HOT OIL. HEAT RESISTANT GLOVES,
PROTECTIVE EYEWARE AND FACE GUARD RECOMMENDED**

1. Open container.
2. Place container in oven or hot plate.
3. Heating slowly, bring glue temperature to 250° F.
4. Heat glue 1-2 hours at 250° F stirring occasionally. Do not exceed 2 hours as burning will occur.
5. Using extreme caution, remove the container with heat resistant gloves and place on a stable surface.
6. With caution, apply with putty knife as desired.

Customize your own traps, any size or shape, to fit your needs. Use whenever rats, mice or crawling insects are a problem. Catchmaster™ Bulk Glue is non-toxic and is approved for use in many areas where pesticide use is prohibited or undesirable.

Catchmaster™ Bulk Glue is a highly specialized adhesive formula that allows the glue to be easily spread, yet will not run in normal high temperatures.
