

CONTAINS NON-PLANT FOOD INGREDIENTS:

Active Ingredients:

Glomus intraradices	80	propagules/gm
Glomus deserticola	5	propagules/gm
Glomus etunicatum	5	propagules/gm
Glomus clarum	5	propagules/gm
Glomus claroideum.....	5	propagules/gm
Glomus mosseae	5	propagules/gm
Gigaspora albida.....	5	propagules/gm
Trichoderma harzianum	145,000	CFU/gm
Bacillus brevis	98,000	CFU/gm
Bacillus subtilis	115,000	CFU/gm

30% Humic Acid derived from Hypnum Peat Moss
70% Inactive Ingredients

Cultural Conditions: This product contains living micro-organisms that are sensitive to certain cultural practices. To avoid inhibiting or killing the organisms, do not use high rates of inorganic fertilizers, especially those with a high proportion of Phosphorus (P). Avoid application of fungicides with PCNB, thiophanatemethyl, or soil fumigants.

NET WEIGHT 1 lb. / 453.59 grams

Made In USA F1507

CLONEX[®]

ROOT MAXIMIZER[®]

MYCORRHIZAE

1 lb.

This product is designed to be used with liquid to create a suspension, and can be used in all soils, plus hydroponic and aeroponic systems. Endomycorrhizae have been shown to benefit over 90% of all plants.

DIRECTIONS FOR USE:

To create a mycorrhizal liquid suspension, mix at a rate of 1 teaspoon of dry product per each 1 gallon of liquid (multiply as necessary for larger applications). Apply as a drench or as a deep root injection. For maximum results, repeat application every 10-14 days.

If being used as a powder for "dusting" the roots, apply the dry contents of this package directly to the root mass, and transplant as normal.

STORAGE

Store in a cool dry place with prolonged temperatures not exceeding 90°F (32.2°C).

Avoid direct sunlight. Product should be used in a well-ventilated place.

EXPIRES NOVEMBER 2018

KEEP OUT OF THE REACH OF CHILDREN
