# Rose & Bloom

CONTINUOUS RELEASE PLANT FOOD

Rosas y flores

FERTILIZANTE DE LIBERACIÓN CONTINUA

Grow gorgeous roses and beautiful blooming flowers with Scott's® Rose & Bloom Continuous Release Plant Food! This Scott's formula provides slow release nitrogen feeding that will deliver nourishment to your roses and flowers for up to 2 months, encouraging vigorous root growth and lush foliage! And, Scott's® Rose & Bloom Continuous Release Plant Food is safe - it won't burn your plants when used as directed.

### Directions For Use:

Scott's® Rose & Bloom Continuous Release Plant Food is great for use on all types of roses from bare root to existing rose bushes and all varieties of blooming flowers. Simply apply the plant food directly from the bag to the soil around all of your garden plants.

### How Much To Use:

Using a dime as a size reference, this illustration shows about how much Scott's® Rose & Bloom Continuous Release Plant Food you should sprinkle on the soil around your plants. For individual (medium size) rose plants, apply 2 tablespoons in an approximate 2 ft. x 2 ft. area surrounding the plant. For larger roses, apply approximately 4 tablespoons in a 3 ft. x 3 ft. area surrounding the plant.

1 cup (10 oz.) covers approximately 30 square feet, or 1/2 tablespoon for every 1 square foot of area

Apply Scott's® Continuous Release Plant Foods every two months during the growing season starting in the Spring. This package provides a single feeding for approximately 40 (medium size) rose bushes or 165 square feet (15 ft. x 11 ft. area). Apply only as directed.

### For Best Results:

- Rake plant food into top 1-3 inches of soil or mulch to allow the nutrients to release directly to the root system.
- Apply plant food evenly around plants. Do not concentrate the plant food near the trunk or crown of plants.
- After application, water in thoroughly to begin the continuous release feeding process.

### Español – Instrucciones de uso

- Aplique el fertilizante uniformemente en la tierra alrededor de las plantas. Una taza (10 onzas) cubre 30 pies cuadrados o 1/2 cucharada por cada área de 1 pie cuadrado.
- Para rosales individuales medianos aplique 2 cucharadas en un área aproximada de 2 pies por 2 pies alrededor de la planta. Para rosales más grandes aplique 4 cucharadas en un área de 3 pies por 3 pies alrededor de la planta.
- Rastrie el fertilizante en la capa superior de 1-3 pulgadas de tierra o cubresuelos o mantillo natural.
- Riegue abundantemente después de la aplicación.
- Vuelva a aplicar cada 2 meses durante la temporada de crecimiento.

### Garantía de Scott's

Si por cualquier razón usted no está satisfecho con los resultados después de usar este producto, usted tiene derecho a que se le devuelva su dinero. Simplemente envíenos su comprobante de venta y nosotros le enviaremos rápidamente por correo un cheque de reembolso.
